Innovative, creative and a proven team player, seeking to secure position in front end development and collaboratively share my skills, expertise and experience with team and valuable clients.

Experience

2019-09-present

UI Lead Engineer

Quaero 3

Quaero CDP

Was responsible for day to day management of Product UI team in an agile environment, understanding and collating requirements from Product managers and implementing them with close coordination with Design team and Product backend team.

Was responsible for recognising talent and developing them via training and mentorship .

Wore the hat of a product owner role in a revamp project , which intended to give fresh look and feel to product UI with better data insights and data visualisation , by actively being involved from the product design phase till completion.

Successfully delivered 4 demo features to boost sales pitch-line , by playing an active role in UI architecture and component design along with a full stack development track which also included API endpoints development.

Took the sole responsibility and ownership of demo environment, which was used by sales and leadership team for sales pipelines, and successfully maintained it with all upgradations and code maintenance of complete demo-able product for over a year and half.

2018-03-2019-09

Senior UI Developer

Quaero 3

Quaero CDP

Built an ideal platform for marketers, analysts and data scientists which helps to overcome the fragmentation of data, analytics and reporting systems. All customer data points blends into a single, coherent human centric data model regardless of type, volume, velocity or source to act as the central nervous system for industry martech stack - coordinating action across all execution channels. Utilised NGRX/Store, Angular 5, HTML, SCSS along with Git And atlassian tools to a completely organised development phase by making use of REST api's to fetch data.

2017-08-2018-03

UI Developer

Dynactionize India Pvt Ltd

Meeting Minutes Application

Focused on developing an application that could keep track of the daily meetings and keep a note of what was decided by who and when, using dynamic features of RxJS along with Angular 5 and flex layout to achieve a responsive application in an organised way and timely reviewed code through git and atlassian tools.
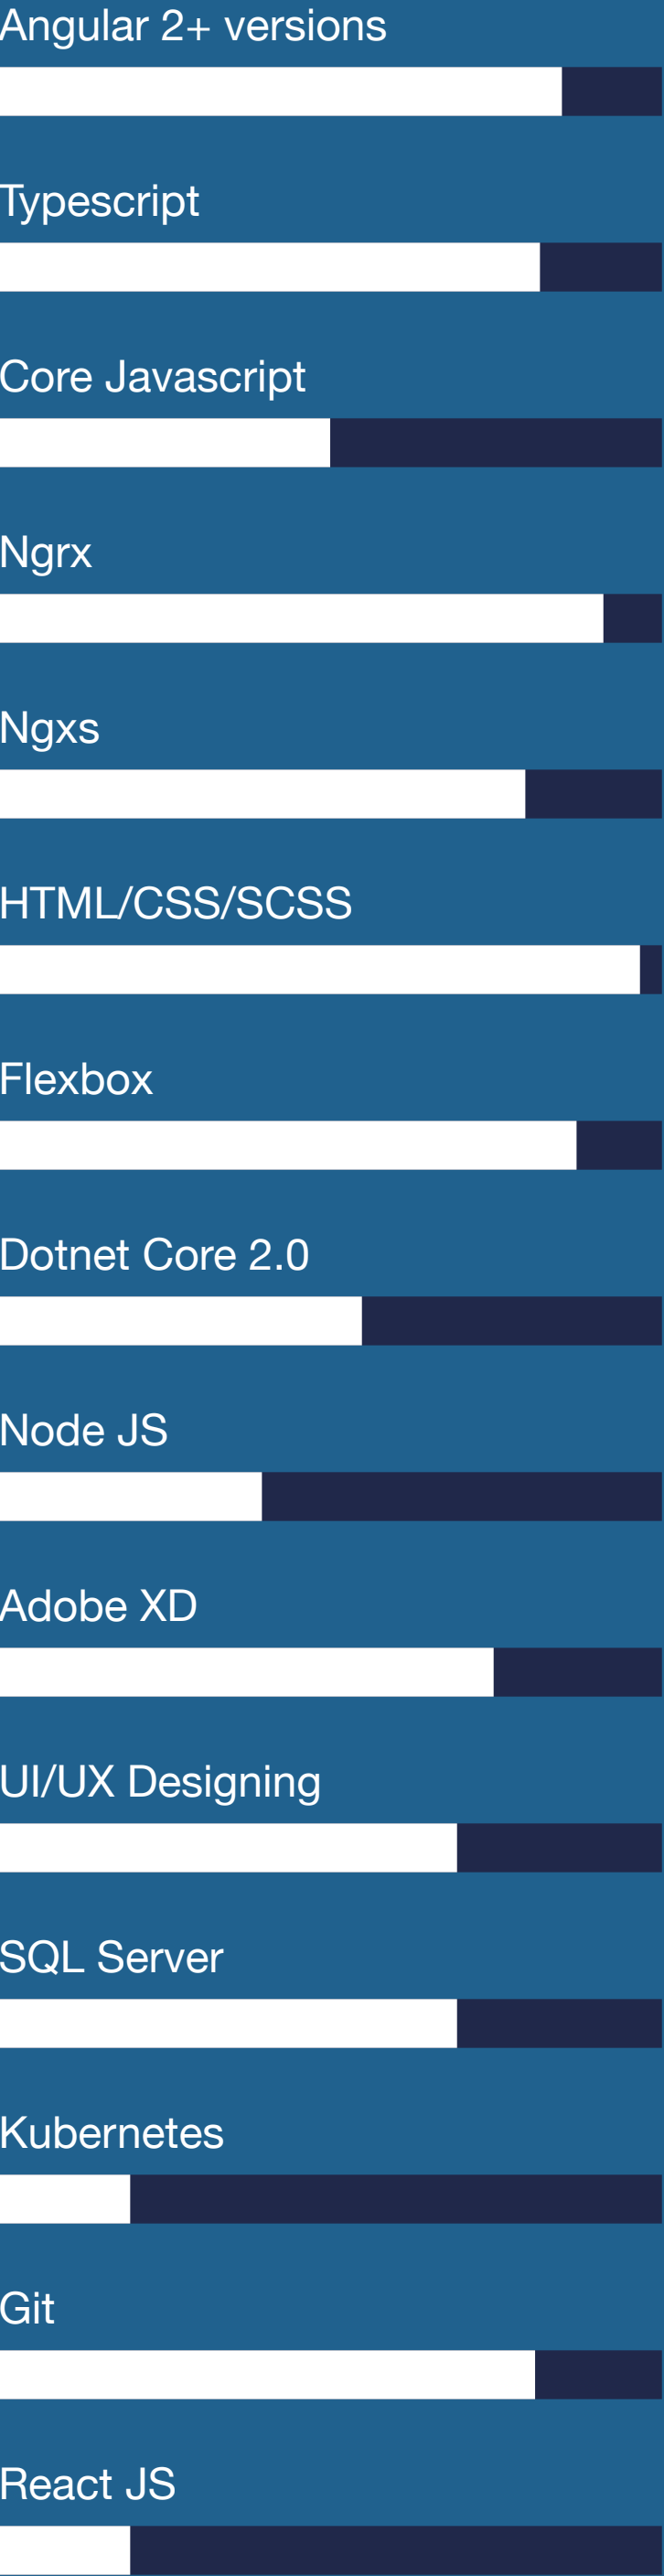

2017-02-2017-07
